

## DATASHEET

# Enterprise Access Management (formerly OneSign)

Enterprise single sign-on and virtual desktop access for fast, secure, No Click Access™ to patient information

## Streamline clinical workflows, simplify EHR access

Imprivata has a strong understanding of healthcare's unique IT requirements and offers a broad portfolio of advanced, healthcare-specific solutions that have been successfully deployed worldwide. Imprivata Enterprise Access Management (formerly OneSign) provides secure and convenient access to electronic health records (EHRs) and patient data, so providers can focus on patient care, not technology. With over 8 million providers using Enterprise Access Management (EAM) as their preferred solution for single sign-on (SSO) and virtual desktop access, Imprivata is the recognized digital identity company for healthcare.

It's easy to see why clinicians get bogged down with cumbersome login credentials. After all, each time they engage with patients, they first need to log in by entering their username and a complex password. In fact, many clinicians will spend up to 45 minutes logging in up to 70 times a day. That's a lot of wasted time, especially when every second counts. Plus, it creates password fatigue and frustration. And that in turn can lead to login workarounds like credential sharing, which brings security risks.

The good news is that EAM makes this process fast and easier by eliminating the need for repetitive, manual logins. Clinicians can just tap their identity badge at a shared workstation, virtual desktop, or mobile device to quickly get to the information they need. EAM securely and automatically logs them in and stores their credentials. They're now ready to access any application - without having to enter credentials again.

## Benefits

- Provides fast, secure access to patient information for every major EHR
- Replaces passwords, improves security, and supports HIPAA compliance requirements
- Enables fast, secure access into on-premises or cloud applications for all users from any device, anywhere
- Offers the industry's broadest native thin and zero client integration
- Saves providers up to 45 minutes per shift

When they're done accessing patient information or other data, they can simply tap out with their badge. Everything is locked down and secure, ready for the next clinician.

As a result, EAM provides peace of mind through improved security for PHI and other vital data, while saving clinicians valuable time better spent focusing on patient care.

## Imprivata Managed Services

Imprivata Services (including professional, managed, clinical, and education) helps organizations with the implementation of EAM and informs and guides technical change management and strategic business planning. They act as a supplemental IT resource, providing hands-on support, training, and remote administration. Benefits of Imprivata Services include increased return on investment, reduced complexity, accelerated time-to-value, reduced cyber risks and threats, boosted efficiency and precision, and end user satisfaction. Imprivata Services provides tremendous value to any customers using Imprivata solutions.

Imprivata is the digital identity company for mission- and life-critical industries, redefining how organizations solve complex workflow, security, and compliance challenges with solutions that protect critical data and applications without workflow disruption. Its platform of interoperable identity, authentication, and access management solutions enables organizations in over 45 countries to fully manage and secure all enterprise and third-party digital identities by establishing trust between people, technology, and information.
